

Course in literature searches and reference management for PhD students at Arts, ECTS Credits: 1/2

This course will provide an overview of the general and professional databases, and other resources relevant for PhD students at Arts. It will introduce the participants to professional search strategies, reference management and tools for monitoring new research. The course will also contain a lecture on the role of the literature review in the dissertation.

Content and format

The course will cover the following areas:

- Academic databases, reference books and full-text resources primarily for Arts
- An overview of library facilities and services
- Exercises in information search strategy and search techniques for academic literature search
- The role of the literature review in the dissertation.
- Monitoring and tools for alert service for current research.
- Reference handling tools, which enable the user to manage bibliographies and to make annotations and bibliographies in accordance with international standards.
